

SE490/491 Software Engineering Capstone Projects: Mentor Final Evaluation Form

Design Team Number: 23

Project Title: Blank OSL

Team Members: Evan He Alan Zhu

Pouria Amini Shirley Fang

Tony Li

Per Project Agreement Form, Mentor Responsibilities: The mentor acknowledges that his/her responsibilities include:

- being available to meet with the student team at mutually convenient in this term, possibly in the fall term, and in the upcoming winter term to provide technical guidance to the student team,
- reviewing and commenting on (but not formally grading) the project deliverables as requested by students,
- assessing the project demonstrated by students near the end of SE490 and near the end of SE491, and
- upholding the students' academic interests above all others.

With this in mind, please comment on the following issues:

Approximately how often did the team meet with you? Biweekly

Do you believe the project was appropriately challenging, requiring upper-year software-engineering knowledge? _____

I believe that the project was appropriately challenging for an upper-year software-engineering capstone course.

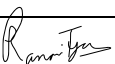

MCP and multi agent systems are complex systems and require knowledge of Operating Systems, UI/UX, AI/ML and other upper-level classes.

Has the project been successfully completed? Yes, the project is successfully completed.

How would you assess final status of the project? Comment as necessary

- Excellent The project is in excellent state.
- Good _____
- Satisfactory _____
- Unsatisfactory _____
